|	
Process: This process outlines the procedure for creating an inventory form for a cost center or WBS area. This form will be used by the requesting area to enter stock requirements from a storage location in the Hospital or offsite warehouse. Having a list of material numbers will speed up the input into the form.	
Role: Authorized Personnel	**Frequency:** When Needed

BEGINNING	
Enter the transaction code in the **Command** field	Z_FORMSM

WEB PROCUREMENT FORM TEMPLATE MANAGEMENT	
Click on the **Requisition Template** button	Requisition Template

MATERIAL TO INSERT

Item Number/Description Material To Insert Item Number/Description When you select a material number and it populates in the **Item Description** list, the number is taken out of the "Material to Insert" list to prevent possible duplication in selection	Enter the material number or click on the **Drop-down List** icon to search for the desired item Example: you may need a material that begins with the number 3, but do not want to scroll through hundreds of items, so type the beginning numbers to bring forward the section and then scroll through the options
Go to **PAR Lvl** column and change the minimum amount to the required number that must be kept in this location at all times	Par Lvl
Click on the **Insert Row** to open a field in the body of the form to allow comments	
To add additional material items to the form, repeat the "Material to Insert" steps	
After entering all items, click the **Save** icon	

CREATE NEW FORM

Click the **Continue** icon to close the box
